Anxiety is an emotion characterized by an unpleasant state of inner turmoil and includes subjectively unpleasant feelings of dread over anticipated events. It is often accompanied by nervous behavior such as pacing back and forth, somatic complaints, and rumination. Anxiety is a feeling of uneasiness and worry, usually generalized and unfocused as an overreaction to a situation that is only ...

Anxiety - Wikipedia

BACKGROUND. This study was guided by nursing, ethics, and health services theory and literature. Rest's (1986) four-component model of ethical decision-making identifies the importance of recognizing ethical issues that evolve from the social, cultural, and organizational environment in which one is embedded. The ethical issue or problem needs to be identified by the moral agent before moral ...
