Seacoast defense was a major concern for the United States from its independence until World War II.Before airplanes, many of America's enemies could only reach it from the sea, making coastal forts an economical alternative to standing armies or a large navy.After the 1940s, it was recognized that fixed fortifications were obsolete and ineffective against aircraft and missiles.

Seacoast defense in the United States - Wikipedia

The Semi-Automatic Ground Environment (SAGE) was a system of large computers and associated networking equipment that coordinated data from many radar sites and processed it to produce a single unified image of the airspace over a wide area. SAGE directed and controlled the NORAD response to a possible Soviet air attack, operating in this role from the late 1950s into the 1980s.

The British men in the business of colonizing the North American continent were so sure they "owned whatever land they land on" (yes, that's from Pocahontas), they established new colonies by simply drawing lines on a map. Then, everyone living in the now-claimed territory, became a part of an English colony. A map of the British
