This is the first part of a seven-part series explaining and setting up a two-tier PKI with Windows Server 2016 or Windows Server 2019 in an enterprise SMB setting, where the hypervisor (host) is running the free Hyper-V Server 2016 or Hyper-V Server 2019, all Certificate Authorities (CA's) and IIS servers are running Windows Server 2016 or Windows Server 2019.

Deploy a PKI on Windows Server 2016 (Part 1) - Timothy Gruber's Blog

Collector Overview. The Collector is the on-premises component of InsightIDR, or a machine on your network running Rapid7 software that either polls data or receives data from Event Sources and makes it available for InsightIDR analysis. An Event Source represents a single device that sends logs to the Collector. For example, if you have three firewalls, you will have one Event Source for each ...
