Chap 10

of the original market. Air pollution from motor vehicles is one example. The cost of air pollution to society is not paid by either the producers or users of motorized transport to the rest of society. We are all made worse off by air pollution but are not compensated for this damage by the market.

Externality - Wikipedia

The principle of maximum entropy states that the probability distribution which best represents the current state of knowledge about a system is the one with largest entropy, in the context of precisely stated prior data (such as a proposition that expresses testable information).. Another way of stating
