The volume control gizmo on the taskbar offers you ultimate and final control over how loud or soft any sound plays anywhere in Windows. To become Master of Sound on the PC, click the Volume Control icon once. Up pops a volume control slider. Use the mouse to slide the gizmo louder or quieter, or to mute sound.

Sound Control on Your PC - dummies

But beyond the obvious appeal of controlling a sound system with something that looks like a Star Trek-style teleportation device, what reasons are there to make the jump to tablet mixing? Mobile Mixing. Traditionally, front-of-house mixing positions have always been static: the mixer is where it is, and you do all your mixing from the one spot.

...

At the dawn of sound recording, recordists were mechanical engineers whose only training was on the job. As the recording industry grew more sophisticated, so did the technology used to make records, yet the need for recording engineers to use craft skill and tacit knowledge in their work did not diminish.
